

Risks and uncertainty factors

Electrolux ability to increase profitability and shareholder value is based on three elements: Innovative products, strong brands and cost-efficient operations. Realizing this potential requires effective and controlled risk management.

Risks in connection with the Group's operations can, in general, be divided into operational risks related to business operations and those related to financial operations. Operational risks are normally managed by the operative units within the Group, and financial risks by the Group's treasury department.

Risks and uncertainty factors

Electrolux operates in competitive markets, most of which are relatively mature. Demand for appliances varies with general business conditions, and price competition is strong in a number of product categories. Electrolux ability to increase profitability and shareholder value is largely dependent on its success in developing innovative products and maintaining cost-efficient production. Major factors for maintaining and increasing competitiveness include managing fluctuations in prices for raw materials and components as well as implementing restructuring. In addition to these operative risks, the Group is exposed to risks related to financial operations, e.g., interest risks, financing risks, currency risks and credit risks. The Group's development is strongly affected by external factors, of which the most important in terms of managing risks currently include:

Variations in demand

Demand for appliances is affected by the general business cycle. A deterioration in these conditions may lead to lower sales volumes as well as a shift of demand to low-price products, which generally have lower margins. Utilization of production capacity may also decline in the short term. In 2012, demand declined in the Group's core markets, while demand increased in growth markets as Latin America and Asia. The global economic trend is an uncertainty factor in terms of the development in the future.

Price competition

Most of the markets in which Electrolux operates features strong price competition. Some of Electrolux markets experienced strong price pressure during 2012. The Group's strategy is based on innovative products and brand-building, and is aimed, among other things, at minimizing and offsetting price competition for its products. A continued downturn in market conditions involves a risk of increasing price competition.

Changes in prices for raw materials and components

The raw materials to which the Group is mainly exposed comprise steel, plastics, copper and aluminum. Market prices of raw materials declined in the first half of 2012. Bilateral agreements are used to manage price risks. To some extent, raw materials are purchased at spot prices. There is considerable uncertainty regarding trends for the prices of raw materials.

Exposure to customers and suppliers

Electrolux has a comprehensive process for evaluating credits and tracking the financial situation of retailers. Management of credits as well as responsibility and authority for approving credit decisions are regulated by the Group's credit policy. Credit insurance is used in specific cases to reduce credit risks. The weak trend in the major Electrolux markets in 2012 impacted the Group's retailers who experienced difficult trading conditions.

Access to financing

The Group's loan-maturity profile for 2013 and 2014 represents maturities of approximately SEK 2,200m in long-term borrowings.

In addition, Electrolux has two unused committed back-up credit facilities. One EUR 500m multi-currency revolving credit facility, approximately SEK 4,200m, maturing 2016 with extension options for up to two more years and a credit facility of SEK 3,400m maturing 2017.

Risks, risk management and risk exposure are described in more detail in Note 1 Accounting principles, Note 2 Financial risk management and in Note 18 Financial instruments.

Sensitivity analysis 2012

Risk	Change	Pre-tax earnings impact, SEKm
Raw materials		
Steel	10%	+/-800
Plastics	10%	+/-600
Currencies¹⁾ and interest rates		
USD/SEK	-10%	+650
EUR/SEK	-10%	+590
BRL/SEK	-10%	-380
AUD/SEK	-10%	-220
GBP/SEK	-10%	-180
Interest rate	1 percentage point	+/-50
