

Auditor's Report on review of Sustainability Report

To the readers of the AB Electrolux Sustainability Report 2012

We have been engaged by the management of AB Electrolux (publ) to review the Sustainability Report for the year 2012 published online, as defined by the references in the GRI index per March 26, 2013 (http://annualreports.electrolux.com/2012/en/sustainability/griindex/gri_index.html). The Board of Directors and Executive Management team are responsible for the company's activities regarding environment, health & safety, social responsibility, and sustainable development, and for the preparation and presentation of the Sustainability Report in accordance with applicable criteria. Our responsibility is to express a conclusion on the Sustainability Report based on our review.

The scope of the review

We have performed our review in accordance with RevR 6 *Assurance of Sustainability Reports* issued by Far. A review consists of making inquiries, primarily of persons responsible for the preparation of the Sustainability Report, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with IAASB's Standards on Auditing and Quality Control and other generally accepted auditing standards in Sweden. The procedures performed consequently do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

The criteria on which our review is based are the parts of the *Sustainability Reporting Guidelines G3.1*, published by the Global Reporting Initiative (GRI), which are applicable to the Sustainability Report, as well as the accounting and calculation principles that the company has developed and disclosed. We consider these criteria suitable for the preparation of the Sustainability Report.

Our review has, based on an assessment of materiality and risk, included e.g. the following procedures:

- a. update of our knowledge and understanding of Electrolux's organization and activities,
- b. assessment of suitability and application of the criteria regarding the stakeholders' need for information,
- c. assessment of the outcome of the company's stakeholder dialogue,
- d. interviews with management at group level and at selected business units in order to assess if the qualitative and quantitative information stated in the Sustainability Report is complete, accurate and sufficient,
- e. examination of internal and external documents in order to assess if the information stated in the Sustainability Report is complete, accurate and sufficient,
- f. evaluation of the design of selected systems and processes used to obtain, manage and validate sustainability information,
- g. evaluation of the model used to calculate CO₂ emissions,
- h. analytical procedures of the information stated in the Sustainability Report,
- i. assessment of the company's declared application level according to the GRI guidelines,
- j. assessment of the overall impression of the Sustainability Report, and its format, taking into consideration the consistency of the stated information with applicable criteria,
- k. reconciliation of the reviewed information with the sustainability information in the Electrolux Annual Report for the financial year 2012.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the information in the Sustainability Report has not, in all material respects, been prepared in accordance with the above stated criteria.
